Article ID: **4187**
Subject: **How to Map MLS Features to the Pro Gold Feature List**
Last Modified: **July 27, 2009**

Applies to: **Pro Gold i2 3.xx**

Purpose: Features are a list of the property attributes and appear with the property on the brand websites of Century21.com, ColdwellBanker.com and ERA.com. Most MLS feeds bring all or some features into Pro Gold i2; however, before the features can be brought into Pro Gold i2, the list of items provided by the MLS must be mapped to the list of items identified in the **Pro Gold Feature List**.

Procedure: Actions required to map the MLS features list to the Crest features list in Pro Gold i2

- Some MLS feeds will assign features to properties when the feed is performed

    - All or only some of the features may be brought in through the MLS feed

- **Mapping features for the MLS feed**: MLS feeds require the features provided to be mapped to the **Pro Gold Feature List** contained in Pro Gold i2 before they will populate the **Features** area within the property record

    - At the **Main Menu**, select the **Settings and Utilities** option
    - Select the **Company Defaults** icon
    - Select the **Misc Tab** and click on the **Map MLS Features** button in the bottom right area
    - The left column is a list of the features as they come in from the MLS feed
    - The center column displays the **Pro Gold Feature List** contained in Pro Gold i2
    - Select a feature from the **MLS Features Column** and select the corresponding feature from the **Pro Gold Features Column** and click the **Green Map** button
    - The mapped features will appear in the **Mapped Features Column** on the right
    - Repeat as needed to complete mapping
    - Click **Done** in the bottom right corner to save the changes and close the screen
    - Use the **Red Remove** button to remove (unmap) a mapped feature

- For more information on manually assigning features to a property, refer to Knowledge Base Article 4162.
